Notice of Electric Line Construction
Energize365
Infrastructure Upgrade Project JC-074807

Dear Property Owner:

Jersey Central Power & Light (JCP&L), a FirstEnergy company, is planning upgrades to the electric line on or adjacent to your property to enhance electric service reliability. The project involves replacing the aging structures and wires you see today with new ones constructed within the right-of-way.

Field survey activities are now complete, and construction is set to begin around early January. This work will continue for several months within the right-of-way on or adjacent to your property. During this time, construction contractors will periodically access the right-of-way and transmission line structures. Areas disturbed during construction will be restored as soon as practical after construction is completed. We do not anticipate any disruption to your electric service because of this project.

On behalf of FirstEnergy, Burns & McDonnell will provide program management services on the project. CW Solutions, Inc., will provide landowner support and an experienced electric line contractor will handle construction. You may have already been contacted by a CW Solutions agent regarding impacts to your property. CW Solutions will continue to be available concerning construction activities.

If you have any questions, please call our project hotline at 1-888-311-4737.

Sincerely,

Michael M. Espinoza
Sr. Real Estate Representative
FirstEnergy Service Company on behalf of
